Related Dental Policy

- Dental Implant Placement and Treatment of Peri-Implant Defects/Disease

Application

This Dental Policy only applies to the state of Ohio. Any requests for services that are stated as unproven or services for which there is a coverage or quantity limit will be evaluated for medical necessity using Ohio Administrative Code 5160-1-01.

Coverage Rationale

Guidelines for Implant Supported Prosthesis

- The implant is fully Osseointegrated
- The implant body to crown ratio is appropriate for the site and anticipated occlusal load, not to exceed 2:1
- There is no evidence of infection
- The implant is not mobile

Fixed Prosthesis

- Cantilever construction should be avoided in posterior areas
- Combined implant and tooth supported prostheses may be appropriate following individual case consideration

Removable Prosthesis

- Implant may be used for support or retention

Complete Dentures (implant Assisted or Implant Supported)

- Two or four implants provide greater stability and security when the maxillary ridge is severely resorbed and lacks resistance to lateral forces
- If the A-P spread is inadequate to provide support, a full-palatal-coverage overlay denture is recommended

Definitions

Abutment: That part of a structure that directly receives thrust or pressure; an anchorage 2: a tooth, a portion of a tooth, or that portion of a dental implant that serves to support and/or retain prosthesis. (AP)

Cantilever Fixed Dental Prosthesis: A Fixed complete or partial denture in which the Pontic is cantilevered, (i.e., is retained and supported only on one end by one or more Abutments). (AP)

Fixed Dental Prosthesis: The general term for any prosthesis that is securely fixed to a natural tooth or teeth, or to one or more dental implants/implant abutments; it cannot be removed by the patient. (AP)

Osseointegration: The firm anchoring of a surgical implant by the growth of bone around it without fibrous tissue formation at the interface (Merriam-Webster)

Pontic: An artificial tooth on a Fixed Dental Prosthesis that replaces a missing natural tooth, restores its function, and usually fills the space previously occupied by the clinical crown. (AP)

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this guideline does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

CDT Code	Description
D6051	Interim implant abutment placement
D6055	Connecting bar – implant supported or abutment supported
D6056	Prefabricated abutment – includes modification and placement
D6057	Custom fabricated abutment – includes placement
D6058	Abutment supported porcelain/ceramic crown
D6059	Abutment supported porcelain fused to metal crown (high noble metal)
D6060	Abutment supported porcelain fused to metal crown (predominantly base metal)
D6061	Abutment supported porcelain fused to metal crown (noble metal)
D6062	Abutment supported cast metal crown (high noble metal)
D6063	Abutment supported cast metal crown (predominantly base metal)
D6064	Abutment supported cast metal crown (noble metal)
D6065	Implant supported porcelain/ceramic crown
D6066	Implant supported porcelain fused to high noble alloys
D6067	Implant supported crown high noble alloys
D6068	Abutment supported retainer for porcelain/ceramic FPD*
D6069	Abutment supported retainer for porcelain fused to metal FPD* (high noble metal)
D6070	Abutment supported retainer for porcelain fused to metal FPD* (predominantly base metal)
D6071	Abutment supported retainer for porcelain fused to metal FPD* (noble metal)
D6072	Abutment supported retainer for cast metal FPD* (high noble metal)
D6073	Abutment supported retainer for cast metal FPD* (predominantly base metal)
D6074	Abutment supported retainer for cast metal FPD* (noble metal)

CDT Code	Description
D6075	Implant supported retainer for ceramic FPD*
D6076	Implant supported retainer for FPD* – porcelain fused to high noble alloys
D6077	Implant supported retainer for metal FPD* - high noble alloys
D6082	implant supported crown – porcelain fused to predominantly base alloys
D6083	implant supported crown – porcelain fused to noble alloys
D6084	implant supported crown – porcelain fused to titanium and titanium alloys
D6085	Interim implant crown
D6086	implant supported crown – predominantly base alloys
D6087	implant supported crown – noble alloys
D6088	implant supported crown – titanium and titanium alloys
D6090	Repair implant supported prosthesis, by report
D6091	Replacement of replaceable part of semi-precision or precision attachment of implant/abutment supported prosthesis, per attachment
D6092	Re-cement or re-bond implant/abutment supported crown
D6093	Re-cement or re-bond implant/abutment supported fixed partial denture
D6094	Abutment supported crown – titanium and titanium alloys
D6095	Repair implant abutment, by report
D6096	Remove broken implant retaining screw
D6097	abutment supported crown – porcelain fused to titanium and titanium alloys
D6098	implant supported retainer – porcelain fused to predominantly base alloys
D6099	implant supported retainer for FPD* – porcelain fused to noble alloys
D6110	Implant/abutment supported removable denture for edentulous arch – maxillary
D6111	Implant/abutment supported removable denture for edentulous arch – mandibular
D6112	Implant/abutment supported removable denture for partially edentulous arch – maxillary
D6113	Implant/abutment supported removable denture for partially edentulous arch – mandibular
D6114	Implant/abutment supported fixed denture for edentulous arch – maxillary
D6115	Implant/abutment supported fixed denture for edentulous arch – mandibular
D6116	Implant/abutment supported fixed denture for partially edentulous arch – maxillary
D6117	Implant/abutment supported fixed denture for partially edentulous arch – mandibular
D6118	Implant/abutment supported interim fixed denture for edentulous arch – mandibular
D6119	Implant/abutment supported interim fixed denture for edentulous arch – maxillary
D6120	implant supported retainer – porcelain fused to titanium and titanium alloys
D6121	implant supported retainer for metal FPD* – predominantly base alloys
D6122	implant supported retainer for metal FPD* – noble alloys
D6123	implant supported retainer for metal FPD* – titanium and titanium alloys
D6190	Radiographic/surgical implant index, by report
D6191	Semi-precision abutment – placement
D6192	Semi-precision attachment – placement

CDT Code	Description
D6194	Abutment supported retainer crown for FPD* – titanium and titanium alloys
D6195	abutment supported retainer – porcelain fused to titanium and titanium alloys
D6197	Replacement of restorative material used to close an access opening of a screw-retained implant supported prosthesis, per implant
D6198	Remove interim implant component
D6199	Unspecified implant procedure, by report

Description of Services

Once integrated into bone (Osseointegration), implants are restored with a crown for individual teeth, or as a retainer tooth for an implant supported bridge. Implants may also be used to prevent resorption of existing bone or aid in retention for full and partial removable dentures. There is some controversy regarding connecting natural teeth to implants with fixed prostheses. During function, the natural tooth has slight movement due to the presence of the periodontal ligament, while the implant is completely integrated with bone, lacks a ligament and does not move. This can create stress at the neck of the implant resulting in possible fracture, breakdown of osseointegration and loosening of the implant and its components. This type of restoration may be the best option in some situations and the decision should be made based on individual patient needs (Al-Omiri).

Date	Summary of Changes
12/01/2023	New dental policy

Instructions for Use

This Dental Policy provides assistance in interpreting the UnitedHealthcare Community Plan of Ohio dental benefit plans. When deciding coverage, the member specific benefit plan document must be referenced as the terms of the member specific benefit plans may differ. In the event of a conflict, the member specific benefit plan document governs. Before using this policy, please check the member specific benefit plan document and any applicable federal or state mandates. UnitedHealthcare

reserves the right to modify its Policies and Guidelines as necessary. This Dental Policy is provided for informational purposes. It does not constitute the practice of medicine or medical advice.
